**DETAILED ACTION**

***Election/Restrictions***

Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group I, claim(s) 1-6 and 8-11, drawn to protein, nucleic acids encoding the protein, and method of recombinantly producing protein.

Group II, claim(s) 7, drawn to antisense DNA.

Group III, claim(s) 12-14 and 16, drawn to antibody to the protein of Group I.

Group IV, claim(s) 15 and 17, drawn to a method of detecting the protein of Group I by immunoassay or method of detecting mesangial proliferative neuropathy comprising measuring the protein of Group II in a biological sample.

Group V, claim(s) 18-20, drawn to transgenic vertebrates.

The inventions listed as Groups I-V do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons: The proteins and encoding polynucleotides of Group I are structurally and functionally different chemical compounds from the antibody of Group III and are structurally and functionally different from the transgenic vertebrates of Group V, and the polynucleotides of Group I are also functionally different from the antisense DNA of Group II, each of which can be made and used without the other. The protein of Group I can also be used in methods other than that of Group IV, such as in a method of producing antibodies. Lack of unity is shown because these compounds and methods lack a common utility that is based upon a common structural feature or use which has been identified as the basis for that common utility.

A telephone call was made to Harriet M. Strimpel on Sept. 13, 2003 to request an oral election to the above restriction requirement, but did not result in an election being made.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Eileen B. O'Hara, whose telephone number is (703) 308-3312. The examiner can normally be reached on Monday through Friday from 10:00 AM to 6:30 PM.
